Mr. Dunn Brown's Experience in Forrign Parts.

Correspondence of the Springfiel! Populfican.

PARIS. Most people have a particular set of organs

to be used in talking, called vocal organs;

but a Frenchman's organs are all vocal. He

talks with every member and muscle of his body and every article of dress he wears. I don't think a parcel of Parisians in strait waistcoats could understand each other. A shring of his shoulders is a whole sentence. A wave of the hand dispenses flowers of thetoric. He emphasises with his elbows and panetuates with his fingers. A flourish of his coat tail is a figure of speech. He shakes metaphors from the folds of his pocket bandkerchief, and at a pinch even his smill box serves to round a period. You ought to have seen the eloquence of one old lady's petticoat, the other day, as she was enlarging upon the advantages of an apartment, for the rept of which your humble servant was negotiating. A good man said to him, "Brother S. The grace with which she flourished that article of wearing amarel about the room, the striking attitudes it assisted her in assuming the great variety of meanings it conveyed, certainly give me new ideas with reference to the capabilities of dress as a medium of thought. Of course in this case the pettiroat was the outside garment. If its voice had been stifled under the folds of a long,awkvard dress, in all human probability the result would have been totally different, for my

own unassisted judgment would have promp

cel me, I confess, to have chosen some other

The earnestness, energy and passion which the French throw into even most ordinary onve-sation is wonderful. I have been sevral times on the point of interfering to precent a quarrel, or quickening my steps to get out of its reach (according as my benevdence or self-love for the moment preponlerated.) when my fears have been removed y seeing the supposed combatants wave ach other a smiling adien and separate in neare. I have been hitherto so much engaged in soring people talk, observing the meer expressions and movements of the face and the grotesque contortions of the body, that I have had little leisure for Teering, or or displaying my own proficiency by talking Whatever remarks I have had occasion to make, however, have been very leadily unlerstood, while of the gibberish advessed to me in return I could hardly make out two word in a sentence; which shows your plainy who speaks the best French. Indeed, it must be acknowledged by the greatest adniver of Paris that very few indeed of her inhabitants speak. French with this purity and correctness of pronunciation which are mparted in most of our American schools and colleges. I find however that they are capacing every day, as I can understand hem much better now than a week since, when I first arrived.

Every thing is done here in the dramatisixle, as might be expected in a city where thirty thousand people attend the theatres exery night. Two market women parting for the night bid each other adien with all the cathos of captive princesses ordered to immaliste execution. The driver of an cimal-me cracks his whip and shouts to his horses with the ardor of a warrior charging the enemy. The vender of cabbages and carrots arranges is vegetables with an eve to the servic effect

ask again, what do you in an to do with ritory would consign him to the penitentiare.
